

## The Health Project—Erratum Statement

### Eastman Chemical Company

In 2011, the original application from Eastman Chemical included a chart that mislabeled years 2004-2005 as baseline years. The program actually began in 1994 and a baseline period would have been prior to that year. The analysis shown in the application followed program participants and non-participants who were matched in 2004 tracked their medical expenditures through 2008.
